

## Actions

- 20% increase in kW of energy produced by countries with preexisting Alt. E resources
- 5% percent of kWh produced non Alt. E countries needs to be converted to Alt. E
  - Technology transfer
    - Carbon credit
  - If exceeded kW can be converted to tons of carbon
- Cost associated to development can be converted to kW and added to countries quota

## Regulation

- Economics committee
  - Reviews costs for each country and converts to kW based individual economic resources.
  - Checks claims of countries to ensure honesty
  - Representatives from each country
    - If cost is to high for a given county, the salary can be paid by another and moneys converted to kW to meet quota

## Regulation

- Energy committee
  - Resource assessment
    - Investigates each countries options for resources
  - Check claims of energy production in kW quantity
  - Reps. from each country to ensure honesty

## Punishment

- If countries don't meet regulation then difference in kW is converted ton of carbon and credits are lost.
